Hyeong-Ohk Fest on Nonlinear PDEs, Collective Dynamics and Finance

Date: 6^{th}-8^{th} June 2024

Location: Seoul National University
(Building 129 Room101)

	6th (Thursday)	7th (Friday)
	Chair: Namkwon Kim	Chair: Jaeyoung Yoon
10:00-10:30	**Hi Jun Choe (Yonsei University)** TBA	**Jongmin Han (Kyung Hee University)** Turing instability and attractor bifurcation for the 1D Brusselator model
10:30-11:00	**Yonghoon Lee (Pusan University)** TBA	**Jihoon Lee (Chung-Ang University)** Existence and Stability of the solutions to the Maxwell-Navier-Stokes equations
11:00-11:30	**Tongkeun Chang (Yonsei University)** The properties of solution for incompressible Stokes equations and Navier-Stokes equations near boundary	**Moonjin Kang (KAIST)** From Navier-Stokes to BV solutions of the barotropic Euler equations
11:30-12:00	**Dongnam Ko (The Catholic University of Korea)** On the interactions of flocking particles with the Stokes flow in an infinite channel	**Joerg Wolf (Chung-Ang University)** A new condition on the vorticity for partial regularity of a local suitable weak solution to the Navier-Stokes equations
12:00-14:00	Lunch	Lunch
	Chair: Dongnam Ko	Chair: Jane Yoo
14:00-14:30	**Minkyu Kwak (Chungnam National University)** A new approach to the theory of inertial manifolds	**Doheon Kim (Hanyang University)** A Lyapunov approach to score-based generative models with multiplicative noise conditioning
14:30-15:00	**Youngsam Kwon (Dong-A University)** Conditional regularity for the compressible MHD system with inhomogeneous boundary data	**Jeongho Kim (Kyung Hee University)** Long-time behavior towards viscous-dispersive shock for Navier-Stokes equations of Korteweg type
15:00-15:30	**Byungjoon Lee (The Catholic University of Korea)** Oscillatory Pattern Capturing Network for Highly Oscillatory Data	**Gyoocheol Shim (Ajou University)** Optimal Consumption and Investment with Costly Reversible Job-Switching Option
15:30-16:00	Coffee Break	Coffee Break
	Chair: Youngsam Kwon	Chair: Seung Yeal Ha
16:00-16:30	**Young-Pil Choi (Yonsei University)** Global Cauchy problem for the Euler-Poisson-Navier-Stokes system	**Seung-Yeon Cho (Gyeongsang National University)** A conservative semi-Lagrangian scheme for the ES-BGK model of the Boltzmann equation
16:30-17:00	**Sang-Hyeok Lee (Korea Maritime Institute)** Maritime Economics & Deep Neural Networks	**Myeong-Su Lee (KAIST)** Solving Inverse Problems in Partial Differential Equations using the Unsupervised Legendre-Galerkin Neural Network
17:00-17:30	**Hantaek Bae (UNIST)** On Decay Rates of Solutions to the Incompressible Navier-Stokes Equations	**Hyeong-Ohk Bae (Ajou University)** TBA
18:00-20:00		Banquet (Hoam Guest House)
