

SNU-HIT Collective Dynamics Day

December 31st (Tuesday) 2024

Department of Mathematical Sciences — Place: 27-220

Seoul National University

09:30-10:20 **Zhuchun Li** (Harbin Institute of Technology)

Target tracking with formation in Cucker-Smale type model

10:20-10:50 **Guanghai Jin** (Seoul National University)

TBA

11:00-13:00 *Lunch* 🍴

13:00-13:30 **Fanqin Zeng** (Seoul National University)

Emergence of flocking behavior for the discrete-time thermomechanical Cucker-Smale model under switching topologies

13:30-14:00 **Xinyu Wang** (Seoul National University)

Clustering behavior of the kinetic Cucker-Smale model with non-compact support

14:00-14:30 **Seungjun Lee** (Seoul National University)

Emergent dynamics for a countable set of Winfree oscillators

14:30-15:00 **Wook Yoon** (Seoul National University)

Mono-cluster flocking and uniform-in-time stability of the discrete Motsch-Tadmor model

15:00-15:30 *Break* ☕

15:30-16:00 **Weichen Fu** (Harbin Institute of Technology)

Some recent work on the Kuramoto-type oscillators with higher-order self-dynamics

16:00-16:30 **Shurui Liu** (Harbin Institute of Technology)

TBA

18:00-20:00 *Dinner* 🍴

Organizer **Seung Yeal Ha** (syha@snu.ac.kr)

Zhuchun Li (lizhuchun@hit.edu.cn)
